# Four categories of adaptive environmental law

- Rules that establish adaptive environmental management
- Rules that are generated from adaptive environmental management
- Rules that are time and site specific
- Rules with the purpose of supporting or reducing the dynamics of ecosystems

## Four categories of adaptive environmental law ?

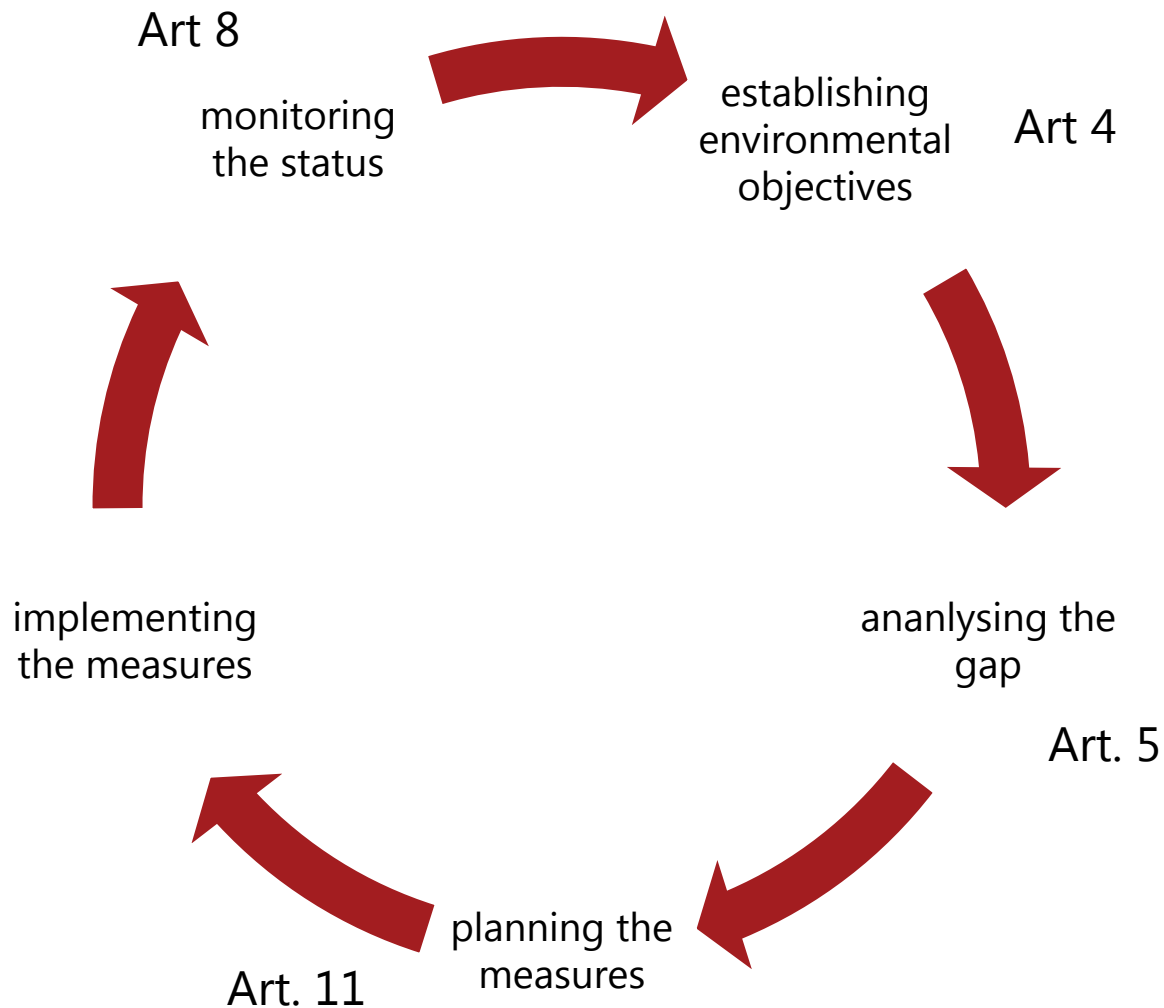

- Rules that establish adaptive environmental management ?
- Rules that are generated from adaptive environmental management ?
- Rules that are time and site specific ?
- Rules with the purpose of supporting or reducing the dynamics of ecosystems ?

# WFD De basic idea: Adaptive planning + Environmental objectives

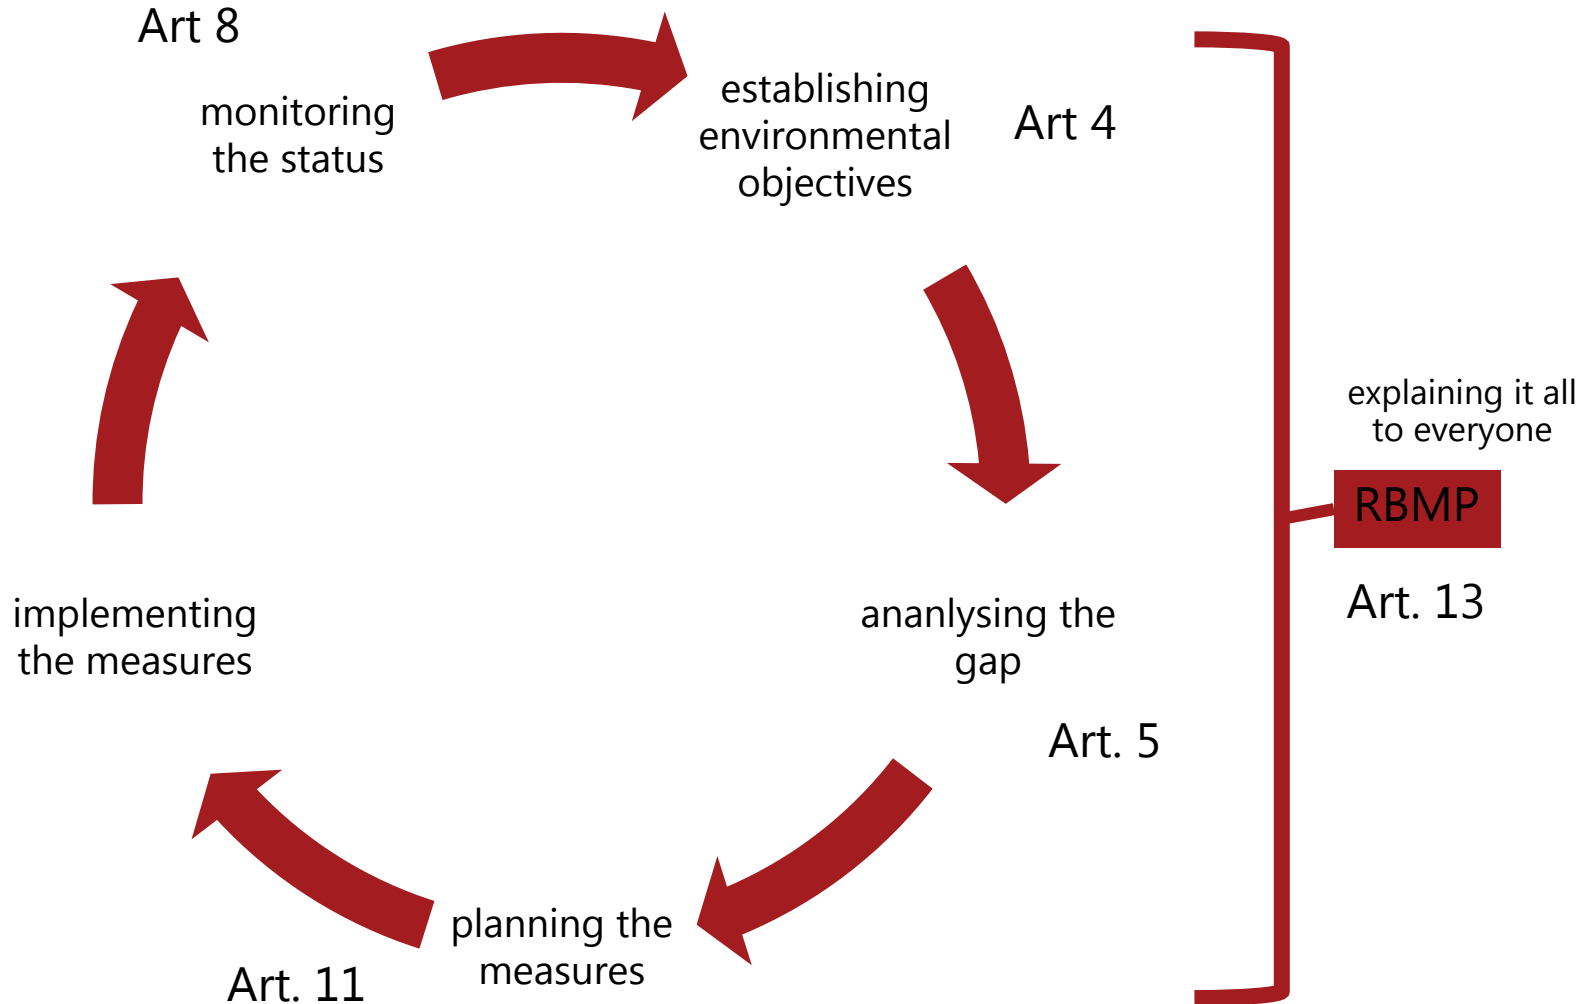

# The basic idea:

Adaptive planning  
+  
Environmental objectives

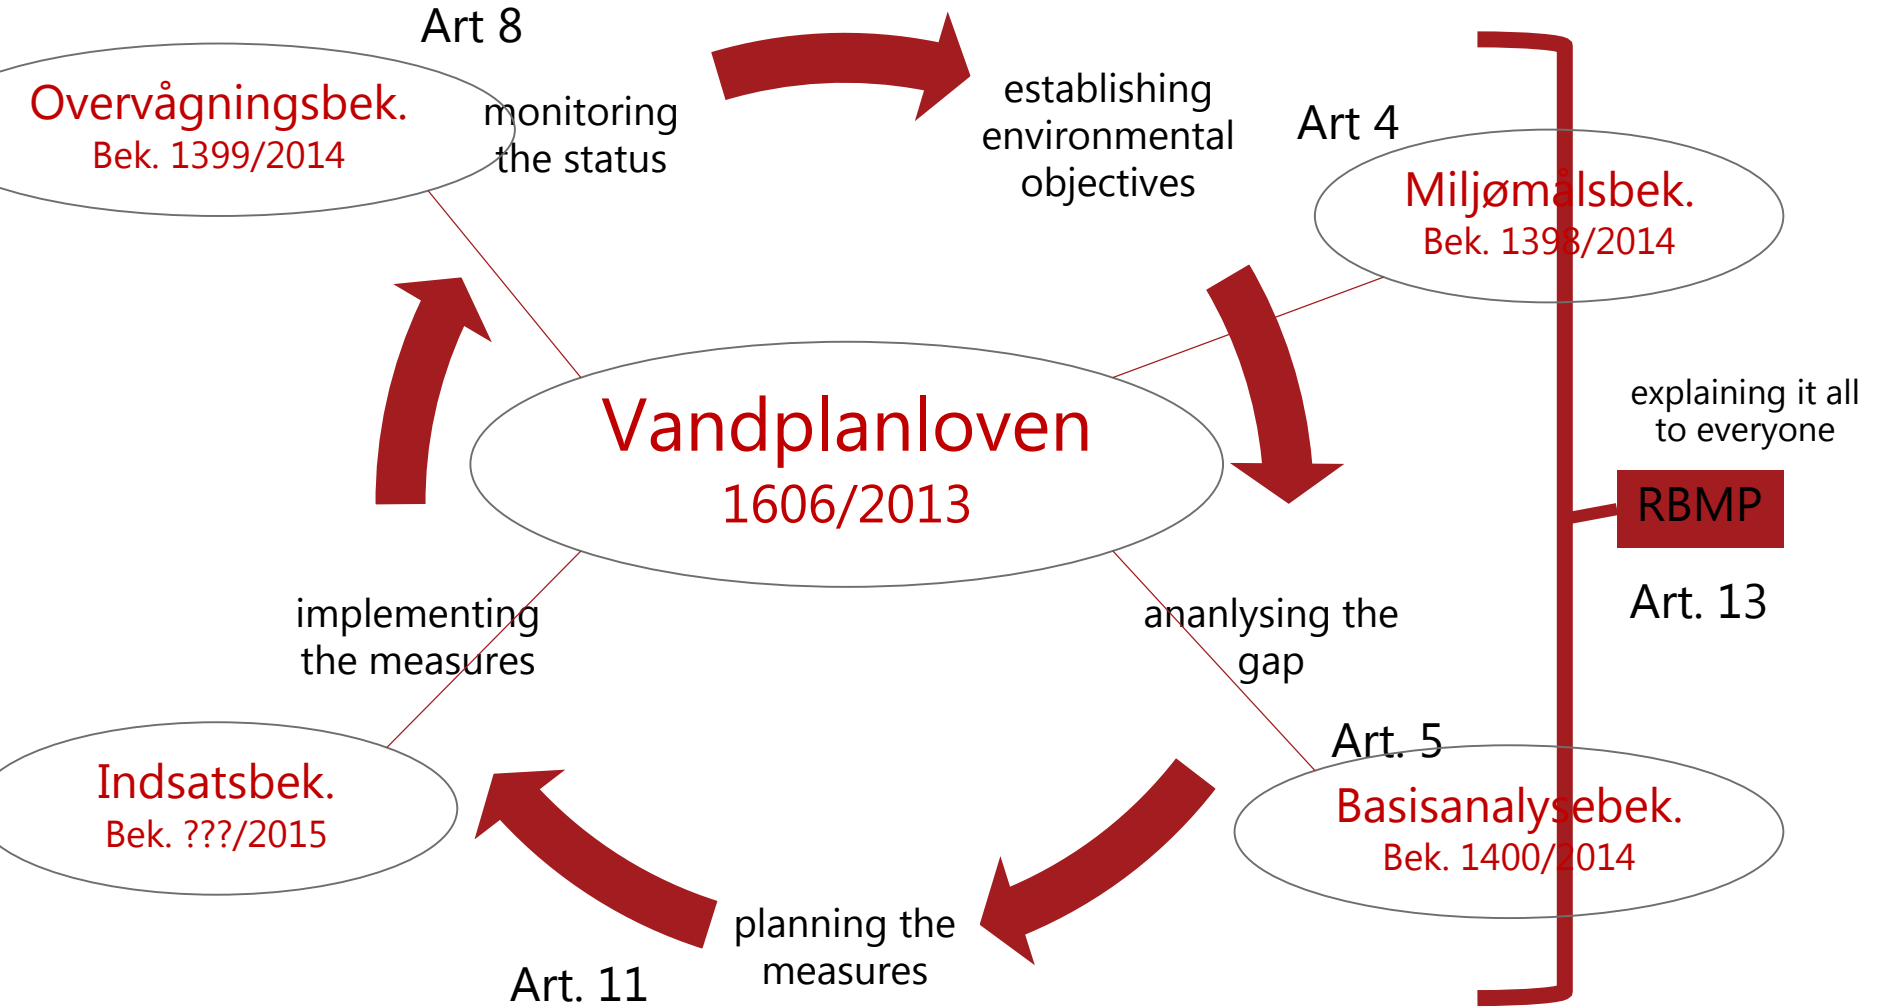

# The basic idea:

Adaptive planning  
+  
Environmental objectives

# The basic idea:

Adaptive planning  
+  
Environmental objectives

## Examples of 'adaptive' rules:

- Adaptive regarding site/location: Skærum Å
- Adaptive regarding environmental impact: Todbøl Dambrug
- Adaptive regarding resource needs/pollution: Kvælstofprognosen

## Four categories of adaptive environmental law

- Rules that establish adaptive environmental management
- Rules that are generated from adaptive environmental management
- Rules that are time and site specific
- Rules with the purpose of supporting or reducing the dynamics of ecosystems - **No examples found – do any of you have an example?**

# Adaptive environmental law

- What adapt to what?
- When and how does it happen?
